

## **Data Entry Prize Drawing!**

*Win FREE 2009 ENROLLMENT in a CLMP monitoring parameter for your lake!*

Simply enter your lake's 2008 data into the MiCorps online Data Exchange, and you will be entered into a drawing to have the enrollment fee for that parameter waived for your lake in 2009.

Data entry by volunteers, rather than CLMP program staff, results in significant cost savings for the program and helps keep the enrollment costs down for everyone. We hope that this drawing will encourage volunteers to participate in the data entry process.

### **Eligibility:**

Enter your field data for your lake in any of the following parameters that your lake is participating in this year:

Secchi Transparency  
Spring Total Phosphorus  
Summer Total Phosphorus  
Chlorophyll a  
Dissolved Oxygen/Temperature

All lakes that enter their data for each parameter prior to the deadline will be entered into a drawing to have their lake's enrollment fee waived for that parameter in 2009. The data entry deadline for the 2008 sampling season is October 30. Late data entries will not be considered for the drawing.

### **Prizes:**

One lake will be randomly selected by drawing for each parameter. The winning lake for each parameter will have their enrollment fee waived for that parameter for 2009. No lake can win a waiver for more than one parameter.

The drawing will take place in November 2008. Winners will be notified and mailed a certificate waiving the enrollment fee for the parameter they won. Winners will be responsible for submitting that waiver certificate to MLSA with their 2009 CLMP enrollment paperwork in order to have the fee waived.
